

# Redefining Your MCAS Process

Simplify your path to regulatory compliance with Sequoia Insight's innovative MCAS reporting and analytics solution.

Regulators closely scrutinize your position in the health plan market, using the NAIC Market Conduct Annual Statement (MCAS). Understanding the details of your business, staying ahead of regulators, and being prepared for questions and audits is vital.

## MCAS Regulatory Compliance Streamlined

Our automated, cloud-based solution leverages your organization's data—implementing robust process and data controls, reconciling against financial statements, validating data integrity, utilizing AI to anticipate emerging risks, creating audit ready, validated MCAS submission files, managing attestation workflows and more—ensuring reliable, proactive compliance support year-round.

## Your Insights on Your Schedule

Our MCAS solution goes beyond audit preparedness providing in depth reporting capabilities and dynamic dashboards, allowing you to continually monitor the business by entity or on a state-by-state level, including emerging risk areas like Mental Health Parity and Denials.

Utilize advanced drill-down capabilities to dive even deeper into your data. Regulators have questions, our solution has the answers.

# Core Features

## Process Controls

Documents and tracks all the end-to-end controls—**ensuring audit readiness.**

- Performs data lifecycle and data quality checks
- Provides a holistic, easy to follow process with resource assignments, scheduling, and tracking
- Displays a dashboard that quickly highlights your process, timeline, status, and issues

## Visualizations

Offers continual access to dashboards, drilldowns, and submission files — **ensuring clarity on your key metrics.**

- Allows for filtering by entity, state, and more
- Presents your MCAS metrics on a monthly basis
- Uses automated AI and alerts you to potential problems as they arise

## Reconciliation

Regularly cross-checks and reconciles your data against your financial statements —**assuring continual accuracy.**

- Verifies your data using thousands of built-in validation rules
- Validates submissions to meet NAIC premium thresholds informed by financial filings
- Alerts you when there are data anomalies

## Automation

Executes workflows for your entire data lifecycle process—**providing cost savings on manual processes.**

- Conducts automated accuracy checks
- Generates audit-ready reports for attestation and submission files
- Displays the status through every stage of the process
